

Wpt. 373 m. 20

laterally where the rocks  
are dipping more steeply  
there are grey strans  
in this upper interval  
egg carton like  
above med. steep  
(photo) sided ones

lots of cover.

a.s. ~18m

Wggy - possibly once ooids?  
micrite clasts in f-med. grinstone  
becomes patz ny outcrop

(mes.)  
Wggy v.f. grainstone  
Some coarse laminae - perhaps x-bedding

med. grainstone - musty look  
like mud chips as opposed to ooids  
intraclast conglomerate w/ micrite  
clasts

Intraclast conglomerate w/ micrite  
clasts

Ooids and mud chips w/ anhydrite  
some grt sand  
anhydrite vesicles, fine grainstone  
w/ micrite clasts (small + large)

laterally visible grains  
v.f. grainstone  
pink weathering, recrystallized  
only somewhat present laterally

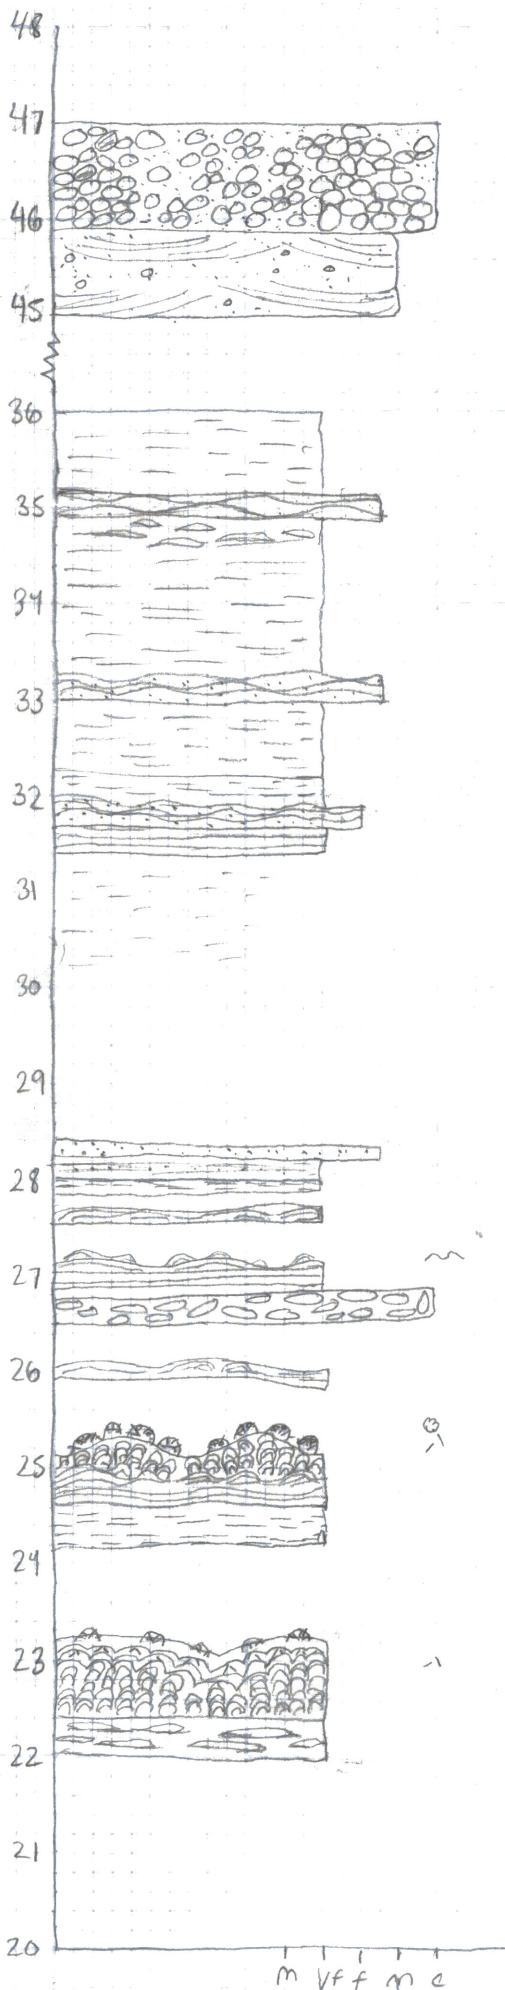

v.f. grainstone some grt.  
10% grt and sand  
massive bedding

brecciated white mudstone  
v.f. ooid grainstone w/ some fine  
weathering recessively ooids

fine ooid grainstone med. bedded  
270/20 Wpt. 372 b.s.

Wpt 371 Breccia n Boath (photo)  
maybe 5m below b.s. not laterally  
traceable

(photos)  
matrix is a med. black sand  
coarse conglomerate w/ clast  
supported rounded

x-bedded pink, med. qtz  
sandstone  
w/ few larger pebbles

cover up to ridge line

fossil weathering silty  
purple

fine grainstone - coarse sand but  
not all sand.

deep purple fossil beds

grey fossil silty beds

fossil still red into  
flaser bedded pink qtz. sand  
v. thin bedded, med. lam. w/  
grainstone  
fossil silty in cover

siltified qtz. sand.  
5% qtz sand; v.f. grainstone fine lam.  
fossil weathering purple silts (carb  
concent)  
wave rippled; finely lam. fossil w/  
grainstone  
wave rippled top on large dunes (dunes)  
v. thin bedded; v.f. grainstone

intraclast conglomerate w/  
micritic clasts

v. thin purple beds just. grainstone

(photos)  
2nd set of beds shows on top are  
large f. have some anhydrite  
but also silica nodules  
fossil red w/ grainstone into wavy  
bedding

some anhydrite lam. (photos)  
that make up large stroms w/ egg  
grains into v. small stroms (carbon  
top)  
deep purple; v.f. grainstone  
weathering patchily
