

Siliciclastic Facies:

- siltstone
- sandstone
- dewatering structure
- hummocky/trough
- XSt vf sandstone

Carbonate Facies and Structures:

- | | | | | |
|-------------------------------|--|--|--|---------------------------------------|
| [siltstone symbol] | [dolomitic oolite symbol] | [irregular to tufted laminites symbol] | [large domal stromatolites symbol] | [tepee structure symbol] |
| [sandstone symbol] | [calcitic oolite symbol] | [intraclast conglomerate symbol] | [Conophyton symbol] | [pisolith and tepee structure symbol] |
| [dewatering structure symbol] | [mudstone symbol] | [edgewise conglomerate symbol] | [medium columnar stromatolite symbol] | [karst feature symbol] |
| [hummocky/trough symbol] | [wackestone with sparse clasts symbol] | [cross-stratified (XSt) grainstone symbol] | [low domal stromatolite and laterally linked small stromatolites symbol] | [deep burial cement symbol] |
