

wpt 228

Stroms in v.f. grainstone; fine
laminae; taller and
more closely packed
^{small} domes
fine oolitic grainstone
w/ fine laminated low
domal stroms

(154/20)
rippled v.f. grainstone
some small stroms

v. thin bedded fine rippled
oolitic grainstns.

rippled fr. oolite

Vf grains - possibly ooids
wave rippled with some large
plant laminae. domes in
between wave rippled grainstsns.

grain size is v.f. again stroms
are more irregular

med. laminated; fine oolitic
grainstone w/ irregular
stroms

v. fine grainstone no ooids

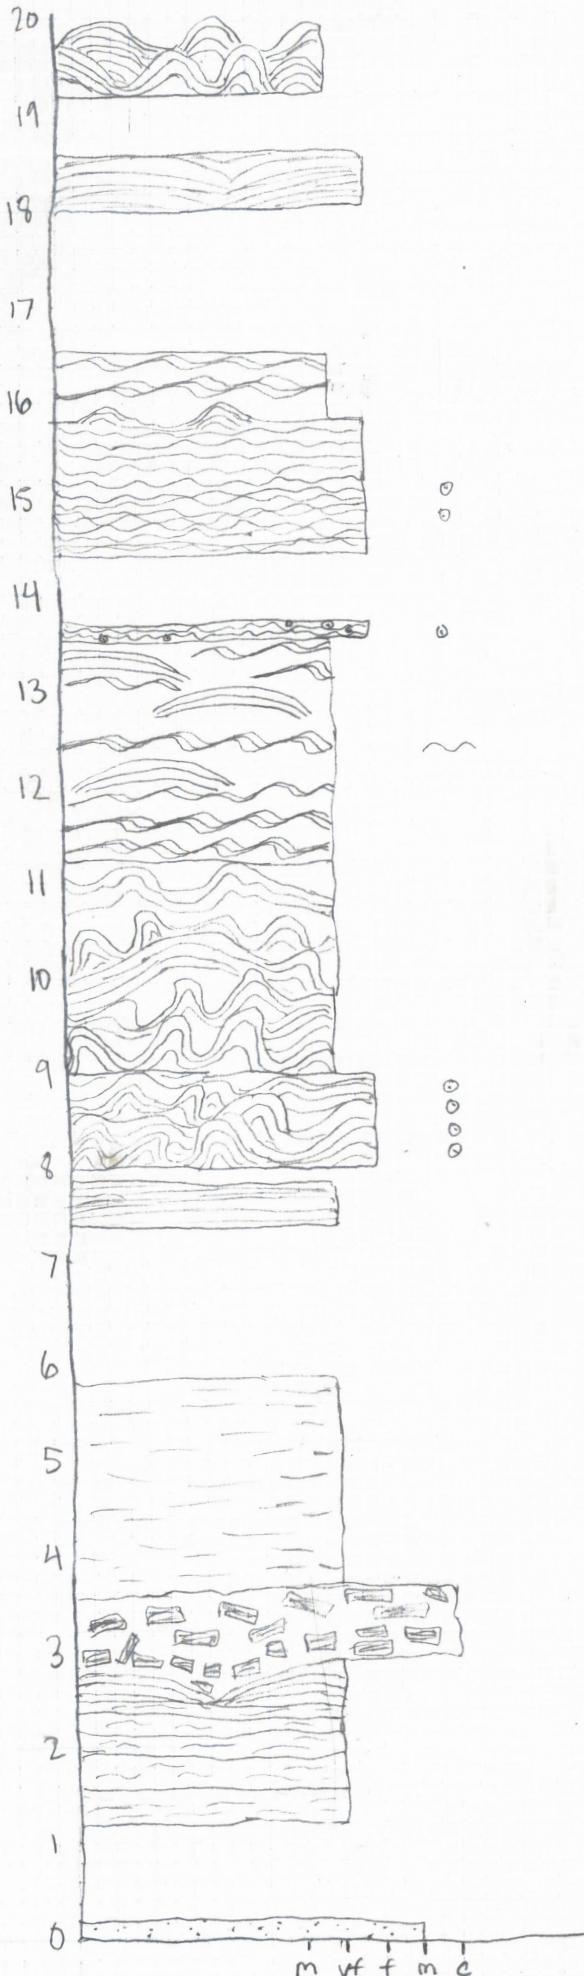

(DD 120/20 wpt 225)

v.f. grainstone weatherly
fissile

w/ breccia of finely lamination clasts
low dominal stroms on top
becomes thin bedded.

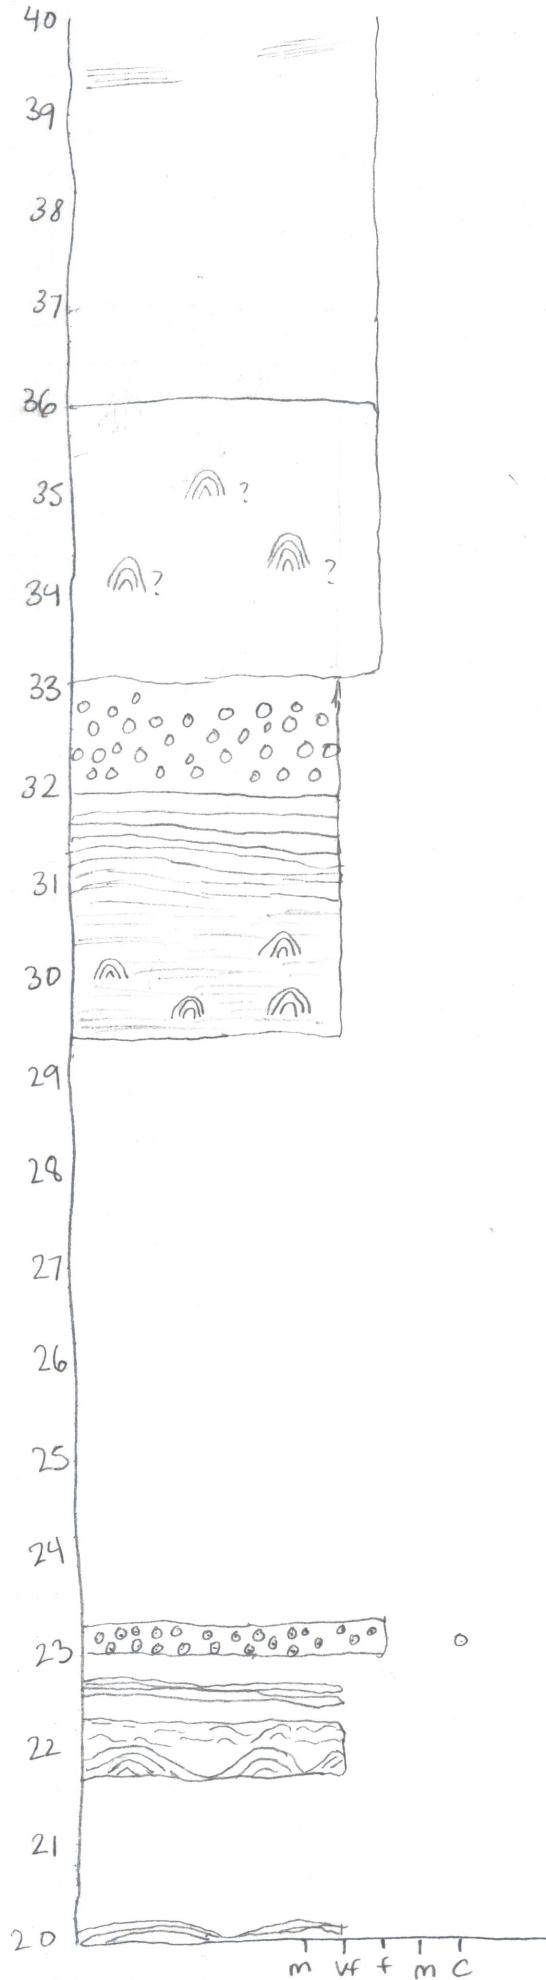

Closely laminated; some ripples
v.f. grainstone
thick bedded

top of med. grained oltc. sandstone

Dunham

Samples

no clear bedding
Some hints of coarse lam.
massive fine grainstones

weathering poorly
some hints of conophyton
but mostly it looks massive
fine grained. Not vf.

spherical weathering
thin bedded; similar laminae
as conoph. but bedded
25 cm high (photo)
they are not well developed
laminae pred w/ blotchy appendage
conophyton

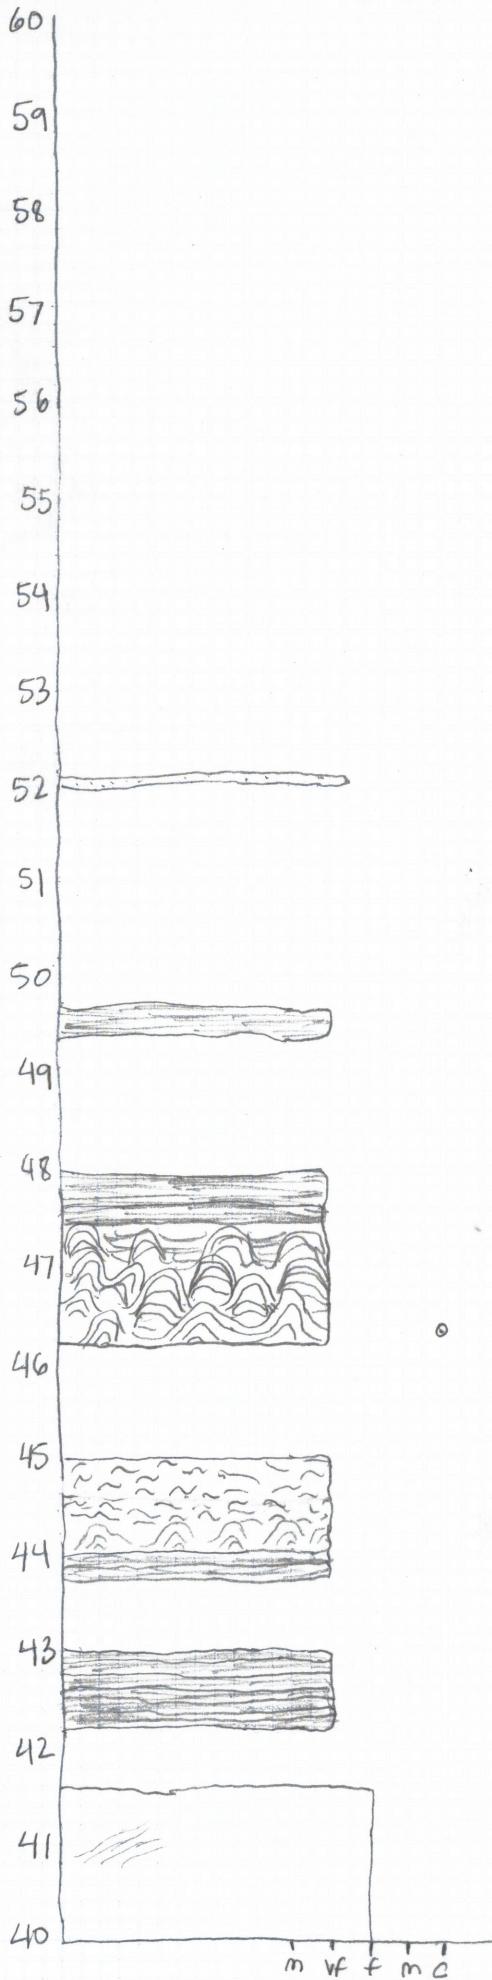

bit of cover but isopachous
strm was sitting at m 26

fine oolite; tan
v. finely bedded; weathering fissile
pink

more irregularly lamin.
higher domal strms. vf. grainstone

continue low strms

ST 1 Page 3

Samples

Dunham

Vf. matrix w/ 10% ch2 sand.
go into covered interval

Vf. med. laminated grainstone
hint of x-bedding

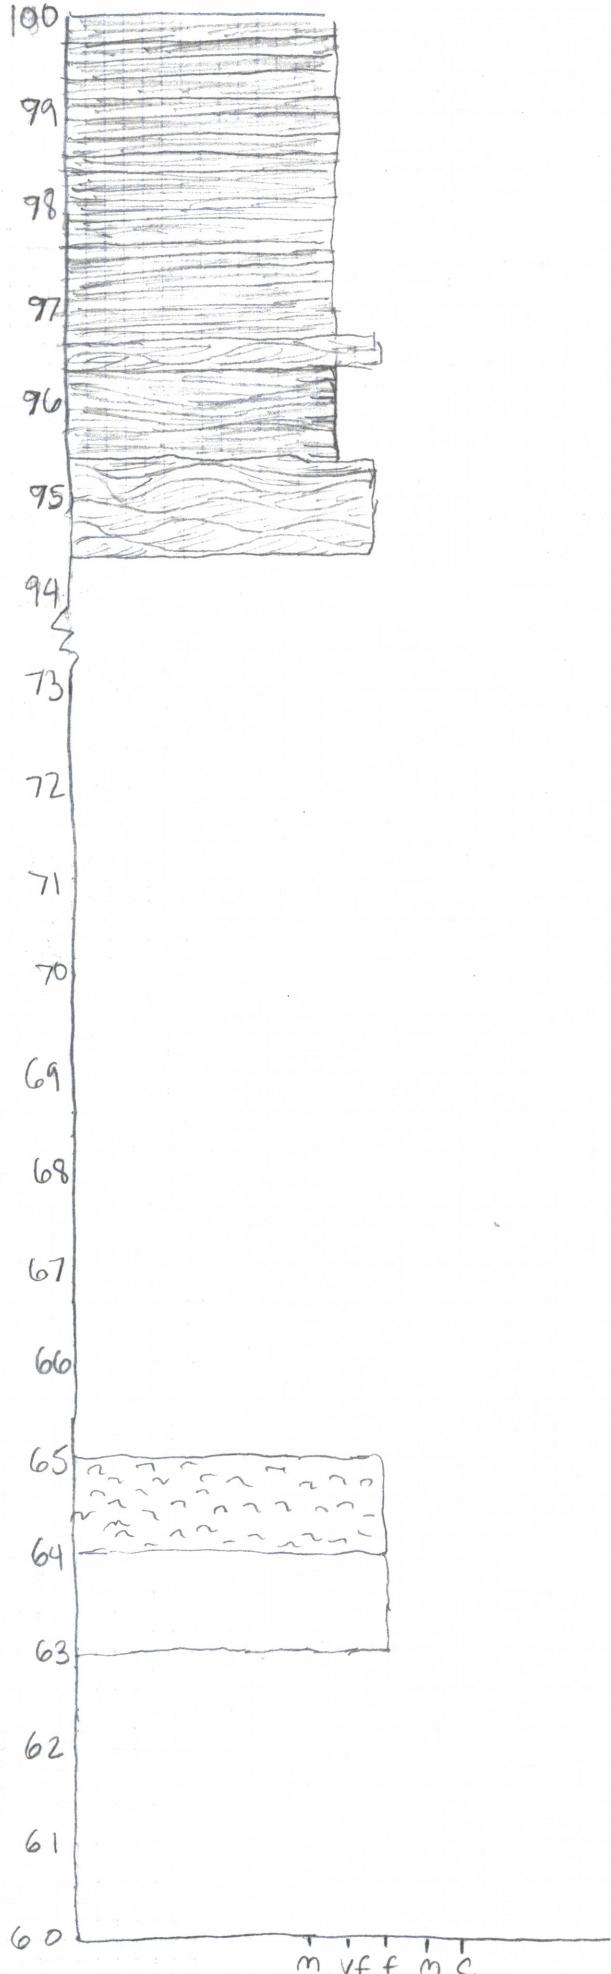

med. planar lamination

Vf. ooids

w/ yellow silted cap of ineq. lamination
Small irregular storm
pink

Vf. thin bedded kfine grainstone
w/ med. laminae

patch of inclined coarse laminae
the rest is massive kf. grainstone

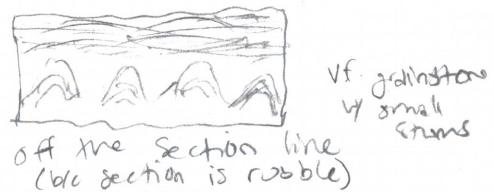

planar
then thick package of
thinly bedded; vf. grainst.
brief return of
fine grained.
v. thinly bedded
very fine grainstone w/ fine lamination

Purple wavy fine grainstones
(possibly ooids)
x-bedded med. laminae

break in column

all cover

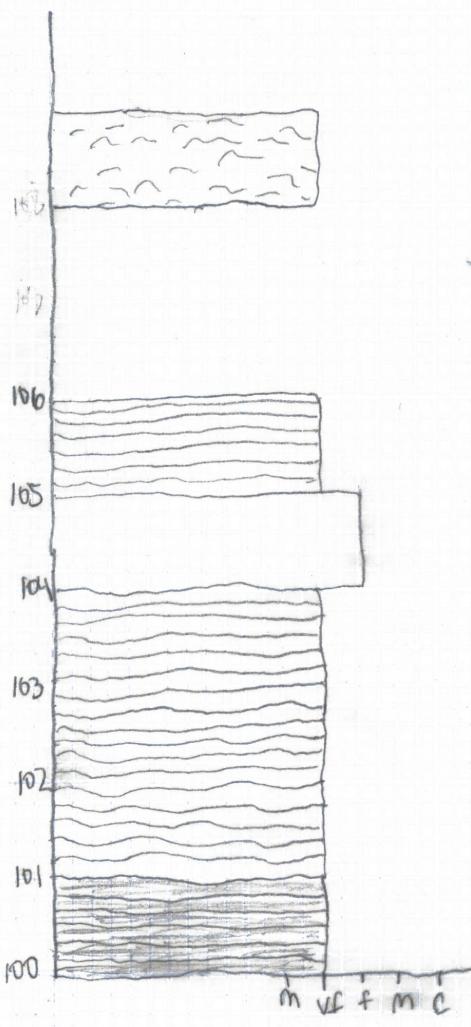

off the section line
(bc section is rubble)

beds on the other side
DP 200/16 WPT 288

- crossing the road -

more fully silicified
irregular laminae

massive; partially silicified
fine grainstone - hint of
grains
Wpt. 257

Samples Dunham

Deep red color on very top
v. f. grainstone
~1 m of partially oolithized iron
hematite
Waypoint 250 at
last prominent bed.
did not stake out to it

return to thin bedded, v.f. j marble
massive f. grainstone

loose laminae - thin wavy
bedding v.f.
